DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Watanabe (USPN 4,527,259).
4. Regarding claim 1, Watanabe (USPN 4,527,259) discloses a similar device. Figure 5 of Watanabe illustrates a nonvolatile memory cell with two switch transistors (8, 9) which have gate electrodes (25, 27) extending along the diffusion layer lines or source and bit lines (15, 16). A memory transistor has a gate electrode (26) with a gate insulating film (23) having discrete traps. It is understood that the memory gate electrode (26) is to be connected to a word line when placed in an array.
